### PART A: PROGRAMME BASED BUDGET (PBB) STATEMENT

#### I. STRATEGIC NOTE

### 1. Major Achievements for 2008/09

- According to the World Economic Forum (WEF) The Global Information Technology Report 2008-2009, Mauritius is ranked 51st on a total of 134 countries (up by three places) and tops the sub-saharan African countries as the "most ICT-ready economy".
- The tariffs for ADSL Home offers have decreased between 33% and 45% for Mauritius and around 42% for Rodrigues with effect from 1 March 2009.
- The Data Protection Act (DPA) 2004 has been proclaimed and appropriate amendments are being brought to make it in line with latest EU requirements. This has unleashed the potential for European investors in the Business Process Outsourcing/Call Centre segments. The Board of Investment has projects worth 1 million Euros that will generate over 100 high paying jobs.
- The Business Parks of Mauritius Limited is recovering possession of land in the Ebène area where the lessees are in breach of the conditions of the Lease Agreement and is leasing out land at market value for ICT businesses primarily. In addition, the possibility of the Employee Real Estate Investment Trust (EREIT) releasing land of around 80 acres in the vicinity of Cote D'Or for further ICT development is being explored.
- The Universal Service Fund (USF) has been established following the publication of the Universal Service Fund Regulation 2008. As at mid April 2009, an amount of Rs 20.85M was available under the USF.
- 48 new government services are now available online in the following areas:
  - Vehicle registration from motor vehicle dealers for National Transport Authority;
  - Tax Returns for Companies for the Mauritius Revenue Authority;
  - E-procurement form for the Procurement Policy Office; and
  - Application forms for the Mauritius Qualification Authority.
- Implementation of the first component of E-Parliament solution (Digital Recording System) at the National Assembly. This involved replacing the Public Address system, setting up of a Digital Recording System and implementing a Voice to Text solution to replace the manual transcription of parliamentary debates. This has resulted in the publishing of the unrevised parliamentary debates within 24 hours.
- An ICT Professional of the Year Award was organised for the first time by the National Computer Board in 2008 with the objective to support and recognise individual contributions in the development of an ICT-based society in Mauritius. This Award was organised in collaboration with the British Computer Society (BCS), the Institute of Engineering and Technology (IET), the Mauritius Research Council (MRC), the Outsourcing and Telecommunications Association of Mauritius (OTAM) and the Information and Communications Technologies Authority (ICTA).

### 2. Major Outputs (Services to be provided) for 2009-2011

Programme 661: Policy and Management for Information and Communication Technology (ICT)

• Policy document on Green Computing in Mauritius for a more secure and sustainable ICT usage.

#### Programme 662: Scaling Up the ICT Sector

- Increase access to broadband facility in households.
- Revised legal framework for an updated ICT environment.
- A re-inforced Information/IT Security level of information systems in Government.
- Technical assistance and capacity building to parastatals, private sectors and general public on information security.
- Assist in the production of a pool of IT professionals.
- A more effective, fast, efficient and secure infrastructure for the Government Online Centre.
- Government applications available online through mobile phones.
- Facilitate the development of the ICT industry by promoting ICT exports and entrepreneurship in ICT.
- Project management services and technical advice to Ministries/Departments.
- IT troubleshooting services.
- IT-related development and maintenance services.
- Creation and maintenance of Government Email Accounts.
- Monthly production of Government Payroll.

### 3. Main Constraints and Challenges and how they are being addressed

• Increased efficiency in Government offices.

Additional servers and other equipment are being purchased for upgrading the existing infrastructure, including redundancy in case of breakdown of the central system. With these investments together with the provision of additional space at the Government Online Centre and additional human resources, the industrial deployment of the Microsoft Enterprise Agreement may take place although Ministry of ICT is of the view that the 7000 licences may not all be deployed by the end of the contract, i.e. 2013.

• Provide Project Management services and technical advice to Ministries and Departments on the implementation of IT Projects

It has been observed that there is a lack of user commitment in the implementation of ICT projects in Ministries and Departments. Consequently, many ICT projects are slow to take off and many projects that have already started are delayed.

As from July 2009, budget for ICT projects is being decentralized so that Ministries and Departments will have funds for their respective ICT projects under their own vote. This will ensure a higher level of commitment from the user Ministries and Departments.

• Assist in the production of a pool of IT professionals.

The Government has recognised that there was an urgent need to develop a pool of IT professionals to support the expansion of the ICT sector, in particular investment in higher value Business Process Outsourcing.

The National Computer Board (NCB) has been asked to contract out the Universal ICT Education Programme (UIEP) to the National Productivity and Competitiveness Council (NPCC). Government has decided that the NCB should move from general training to the development of a pool of IT professionals. The NCB would concentrate on looking into the conduct of professional courses to supplement the demand in the industry.

The NCB is collaborating with the Outsourcing and Telecommunications Association of Mauritius (OTAM) to identify training needs for the local ICT industry and set up an ICT Training Academy.

The training would focus on areas where there is scope for back-office outsourcing such as finance / accounting, with particular emphasis on the IRS and the hospitality industry.

Emphasis would be placed on sandwich courses which are more affordable to students and that would provide skilled labour earlier than from purely academic training.

### II. LIST OF PROGRAMMES, SUB-PROGRAMMES AND PRIORITY OBJECTIVES

Programme 661: Policy and Management for Information and Communication Technology (ICT)

- Formulate policies related to the ICT sector and ensure implementation thereof.
- Support the Minister in formulating policies based on ICT that can be effectively implemented and fully costed and financed.

#### Programme 662: Scaling Up the ICT Sector

Sub-Programme 66201: Enabling Environment for Harnessing ICT

- Ensure effective regulation of the ICT sector in the emerging "converged" environment.
- Streamline internal processes of the government to ensure efficiency, accountability and transparency.
- Increase awareness of users on information security standards and ensure safe IT systems in Government.

### Sub-Programme 66202: e-Powering the Society

- Provide proactive information security incident handling and management services to public and private sectors;
- Assist in the creation of a pool of IT professionals;
- Facilitate the transformation of Mauritius into a regional ICT Hub;
- Assess the development of the Information Society in Mauritius through studies and monitoring of ICT indicators;
- Ensure high availability and reliability of the services of the Government Online Centre and availability of e-services.

### Sub-Programme 66203: Promoting e-Governance

- Provision of project management, consultancy and advisory services to Ministries and Departments for the successful implementation of e-Government projects and on ICT matters.

### Sub-Programme 66204: ICT Operational Services

- To deliver timely and cost-effective ICT operational support services to all Government Institutions through:
  - assistance on IT troubleshooting;
  - application software development;
  - maintenance of Government Intranet System and Government Email Services;
  - availability of Oracle Technical Support.

#### III. SUMMARY OF FINANCIAL RESOURCES

|       |                                     | Rs          | Rs           | Rs          | Rs          |
|-------|-------------------------------------|-------------|--------------|-------------|-------------|

### **NON-FINANCIAL DATA**

**PROGRAMME 661** (7 staff and 2.4% Budget of the Ministry): **Policy and Management for Information and Communication Technology (ICT)** 

**Outcome:** Ensure a well managed Ministry which fosters the appropriate environment for the development of a competitive and innovative ICT industry aimed at improving the quality of life of citizens through better connectivity and wealth creation.

PROGRAMME 662 (274 staff and 97.6% Budget of the Ministry): Scaling up the ICT Sector

#### **Outcomes:**

- Achieve a more efficient and responsive Government able to deliver an improved, cost-effective and prompt service to the public;
- Increase the ICT sector's contribution from 5% of GDP in 2007-08 to 6% in 2009 and to 7% by 2010.

# **SUB-PROGRAMME 66201** (42 staff and 51.8% of Budget of the Ministry): **Enabling Environment for Harnessing ICT**
