STRATEGIC OVERVIEW

I. Mission Statement

- To increase agricultural land productivity and local production, ensure food security, promote environmentally sustainable agricultural practices and increase export revenue
- To protect and conserve the country's unique biodiversity

II. Current Situation & Challenges

- In 2020, the share of agriculture in the economy was 3.4 percent, of which around 12 percent was from sugarcane, 20 percent from livestock and poultry, 11 percent from fisheries and 40 percent from food crops.

	Area Harvested (ha)			Production (tons)	
	2010	2020		2010	2020
Sugarcane	58,709	43,711	Sugar Production	452,473	270,875
Tea	698	685	Tea Manufactured	1,467	1,083
Food Crops ¹	7,570	7,456	Food Crops	114,844	94,410

- Land area under cultivation of sugarcane and food crops declined over the years.
- Since 2010, there has been a shift in production systems geared more towards sheltered farming and bio-farming systems, with an estimated annual production of 12,000 tons. In addition, some 5,000 tons of water-based greens and superfoods (such as breadfruits and butternuts) are also being produced annually.

¹ Food crops cultivated under open field only.

- In order to bring more land under cultivation, the first phase of the Centralised Digital Land Bank has been launched in February 2021 with 350 arpents of land available for lease to planters through the online platform (www.agrilandbank.com).

Key Challenges

- Self-sufficiency in food requirements
- Adverse climatic conditions and impact of climate change
- Ageing workforce and labour shortage
- Bringing back abandoned lands for agricultural purposes
- High cost of production
- Dependency on imported inputs, including planting materials and seeds
